

# FORAGE SORGHUM

## F 45-S10

## MALE STERILE

- BMR-6 Hybrid
- Male Sterile
- Excellent yield for maturity
- Very good forage quality
- Excellent standability
- Shortest forage sorghum in our lineup
- Safened Seed
- Plant after soils reach 60 degrees

### RATINGS

Yield For Maturity	10
Forage Quality Yield Potential	8
Palatability	8
Digestibility	8
Seedling Vigor	9
Recovering After Cutting	8
Plant Uniformity	8
Standability	10
Downy Mildew	4
Anthraco nose	9
Fusarium Wilt	NR

### FIELD POSITIONING

Tough Dryland	Hs
High Yield Dryland	HS
Limited Irrigation	Hs
Full Irrigation	Hs
High pH Solid Iron Chlorosis	S
No Till	Hs
Poorly Drained Soils	Ma
Anthraco nose Prone Area	Hs
Sugarcane Aphid	T

### CHARACTERISTICS & CROP USE

Relative Maturity: Early	Silage: 10
Midrib: BMR-6	Dry Hay: 8
Seeds/lb. (1,000): 15-17	Continuous Grazing: 8
Plant Height: 7-8 ft	

#### KEY:

Hs-Highly Suitable  
S-Suitable  
Ma-Manage Appropriately  
Ht- High Tolerance  
T-Tolerant  
NR-Non Resistant  
10=Best, 1=Worst
