

GRAIN CORN

BETTER GENETICS.
BETTER PRODUCTIVITY.
BETTER PROFITABILITY.

SEEDWAY
FARM SEED

SW 3750

HIGHLIGHTS

- Conventional grain profile hybrid with good silage production at higher populations
- Exceptional drydown including northern environments and cooler locations at elevation
- Efficient plant profile for good water utilization
- Good stand establishment history suited for minimum tillage and early planting
- Dries well in field, reducing drying cost and boosting grain profitability
