

CLOVER

BETTER GENETICS.
BETTER PRODUCTIVITY.
BETTER PROFITABILITY.

FROSTY

BERSEEM CLOVER

FROSTY BERSEEM CLOVER

Berseem clover, *Trifolium alexandrinum*, is a cool-season annual legume. Featuring salt tolerance, high nitrogen fixation, and a synergistic relationship to alfalfa. Frosty, while preserving its Mediterranean genetics, has been bred for later maturity, cold tolerance, productivity, and nutritional value. Frosty has very low hard seed counts, allowing for quick establishment and lessening its potential to become a weed.
