DEPURPLE

67 Day Cauliflower

KEY CHARACTERISTICS

- DePurple produces a large, heavy head with early maturity. The florette stems are white and are very attractive when cut. Some heat tolerance and works in early spring sowing and fall. It tastes good raw and holds its color reasonably well when cooked. While in spring DePurple is a vivid dark purple, but it may be more lavender colored when maturing in cool weather. Handle the heads carefully at harvest to avoid bruising.

Relative Maturity

67 Days

Head Description

6" - 7"
Medium Dome
Brilliant Violet Purple

Plant

Large
