

# MIXES

BETTER GENETICS.  
BETTER PRODUCTIVITY.  
BETTER PROFITABILITY.

## S-325

### KEY CHARACTERISTICS

- Ideal for wetter than normal soils.
- Suitable for river bottom fields and low lying areas.
- High yielding with excellent forage quality.
- Soft leaf forage varieties - increases palatability and will dry down quickly to make dry hay.

### SEEDWAY 325

Ideal mixture for ground that lies wetter than normal. Consists of species that do well in wetter areas as well as better conditions. High yielding with excellent forage quality makes this mix suitable for river bottom fields and low lying areas. Species are all soft leaf which increases palatability and will dry down quickly to make dry hay. There are no alkaloid or endophyte issues with the species in this mixture.

### PROPRIETARY MIX INGREDIENTS

35% Teton / Dominate Tall Fescue

35% Marquise Meadow Fescue
