† See last page for Product/Brand, Technology and Type information. †† Milk/ton: calculated from Rock River data using Milk2006 Traditional 48 hour. **Bold** values significantly better than test average. **ns** = not significant

TEST COMMENTS: *Planting conditions were excellent. Conventional tillage and good soil moisture gave uniform emergence for all hybrids. The plot looked great through June. Rains shut off for most of July and early August. Rootworm larvae pressure was high, and with low soil moisture, root lodging was evident with certain hybrids. The plot turned out better than expected for the lack of rainfall and heat. The overall rating of the plot is 7 out of 10.(10=best)*
