SW ANNUAL POLLINATOR MIX

SW Annual Pollinator Mix is formulated to not only be a beneficial pollinator mix, but an excellent cover crop mix that will build the soil with nitrogen and organic matter. Since the mix is annual, timing is important for proper planting time and should be sown early enough to have bloom for the pollinator species. Spring planting or early fall is ideal.

SEEDING RATE

25-30 lbs. per acre

MIX COMPONENTS

- 25% - Spring Maxx Pea & Oat Blend
- 15% - Purple Bounty Hairy Vetch
- 15% - Crimson Clover
