ORGANIC GROWERS:

Please specify when ordering that you need
organic or untreated seed.

OUR SKU's: Our organic varieties will have an "OR" in the product code. Untreated seed will have an "NT" or "NCT". Pelleted seed is designated with a "Z" and primed is an "X". All pelleting and priming offered in this catalog are approved for organic growers.

ORGANIC

Organically produced seeds are identified with our organic symbol and will be clearly labeled on the package. We offer untreated conventionally grown seed if, to our knowledge, suitable organic production of a variety is not available. All varieties in this catalog are developed and produced by traditional methods. None of the items have been genetically modified, and to the best of our knowledge, none of this seed has been contaminated with any genetically modified material. We are certified as an Organic Handler by PCO, Pennsylvania Certified Organic and USDA, U.S. Department of Agriculture.

BEANS

1,600 - 2,500 seeds/lb.

PROVIDER 48 Days - #8009NT

A dependable favorite for those needing an early, short season variety with a concentrated set. Produces 5½" light green, tender beans. Seed develops quickly, so pick promptly. **IR:** BCMV

1lb. @ \$4.14 5 lb. @ \$3.44 50lb. @ \$3.24 500lb. @ \$3.04 2500lb. @ \$2.94

PV857 For Hot Weather - 53 Days - #7802NT

The best heat set bean we have seen! Plant for mid summer flowering. Erect bush, concentrated sets of 3 - 4 sieve pods. **HR:** BCMV, **CI IR:** Ua:90

10M @ \$3.51 80M @ \$3.26 800M @ \$3.16 4000M @ \$3.06

CARSON Yellow Wax - 53 Days - #9384NT

An early wax that handles stress well with good sets and yields. Carson has nice, straight pods that color up while still small. 5½" round pods. **HR:** BCMV, **CI IR:** BCTV, Ps

10M @ \$4.40 80M @ \$4.15 800M @ \$4.05 4000M @ \$3.95

NEW LUNAR Excellent Bush Habit - 56 Days - #3874NT

Strong seed quality. Excellent plant habit for easier harvest. Does well in hot growing conditions. Uniform dark green pods. **HR:** BCMV **IR:** Ua

10M @ \$3.54 80M @ \$3.29 800M @ \$3.19 4000M @ \$3.09

SYBARIS Fancy, dark - 56 Days - #8785NT

Sybaris features fancy, dark green 5½" pods with very good flavor. The strong plants hold the beans up high, making Sybaris a good choice for hand-pick, although it can also be machine harvested. **HR:** BCMV **IR:** Ua:90

10M @ \$3.96 80M @ \$3.71 800M @ \$3.61 4000M @ \$3.51

CAPRICE Fresh or Canned - 56 Days - #9349NT

Glossy 5½ to 6" pods give a great appearance and quality. Upright plants provide concentrated sets in the upper 2/3 of the bush.

10M @ \$4.45 80M @ \$4.20 800M @ \$4.10 4000M @ \$4.00

HOME RUN Roadside/Home Garden - 56 Days - #4457NT

A large bush which produces long, straight pods suitable for multiple hand harvest. Great bean taste. **HR:** BCMV

10M @ \$3.54 80M @ \$3.29 800M @ \$3.19 4000M @ \$3.09

NAVAJO Flat Pod, Roma Type - 56 Days - #4445NT

A flat pod with a compact, erect bush and straight pods that are 0.75" wide. **HR:** BCMV

10M @ \$4.61 80M @ \$4.36 800M @ \$4.26 4000M @ \$4.16

FORDHOOK 242 Lima - 75 Days - #8059NT

Each 3"- 4" pod contains 3 - 4 beans. Vigorous, sturdy plants produces consistently large crops of excellent quality beans with a good shelf life. Best large seed lima for fresh market. Requires warm soils.

1 lb. @ \$4.35 5 lb. @ \$5.30 50 lb. @ \$4.90 500lb. @ \$4.60 2500 lb. @ \$4.50

SUPREMO PLUS

SUPREMO PLUS Horticulture Bean - 72 Days - #6237NT

The true bush bean is far earlier to pick than vining types. Plump pods have white beans and cranberry stripes. Beans are usually eaten fresh (like a fresh lima) but can be dried.

5 lb. @ \$5.70 50 lb. @ \$5.30 500 lb. @ \$4.95 2500 lb. @ \$4.80

FAVA BEAN Shell Bean/Cover Crop - 85 Days - #8062NT

Good for your soil and spring sales. HR: BCMV, CI IR: BCTV, Ps

5 lb. @ \$5.65 50 lb. @ \$5.25 500 lb. @ \$4.90 2500 lb. @ \$4.75

CALIFORNIA BLACK-EYE Southern/cow Pea - 75 Days - #8414NT

Tall, bushy plant bears green/tan pods level with foliage.

5 lb. @ \$3.86 50 lb. @ \$3.52 500 lb. @ \$3.30 2500 lb. @ \$3.14

Other beans usually available untreated include: Long Tendergreen, Valentino, Roma II, Jade, Greenback, Greencrop, Goldenrod (wax), Top Crop (Crop Failure for 2023), Kentucky Wonder 125, State Half Runner (Crop Failure 2023), and Top Pick Pinkeye.

BEETS

BRESKO 50 Days #4607NT

Smooth, round roots grow medium-fast and have vigorous, medium-large, clean leaves. Bresko has some of the best Cercospora resistance available in a red beet. Healthy, medium sized tops, and nice shape make it perfect bunching.

10M @ \$1.79 50M @ \$1.71 500M @ \$1.56 1MM @ \$1.49

BORO 51 Days

Boro is the best choice for baby beets and bunching, due to a refined shape and smooth skin while small (it will grow full-sized, quickly). Unlike other varieties that are good for baby beets, Boro is quite early and features a very deep color and sweet flavor. Round to slightly top-shaped roots have a small stem/crown attachment. 12" tops stay cleaner than any other red variety we know. It is widely adapted.

#5039NT

10M @ \$1.79 50M @ \$1.71 500M @ \$1.56 1MM @ \$1.49

10M @ \$3.11 50M @ \$2.98 500M @ \$2.72 1MM @ \$2.59

BOHAN 52 Days - #6790NT

The eye catching new beet has very smooth skin and a round shape. It has vigorous, strong and clean tops. An excellent beet for its ability to handle stress including heat, plus too much water or not enough. Internal quality is excellent with great sweetness.

10M @ \$1.37 50M @ \$1.31 800M @ \$1.20 1MM @ \$1.14

RED ACE 53 Days

Early maturing with 3" roots that are uniformly globe-shaped with small taproots. Almost no zoning. This heat resistant beet has smooth skin and a high sugar content.

IR: Cercospora LS.

Raw Organic - #8076OR ORGANIC Phone For Pricing & Availability In Late Spring

An improved strain of heirloom beet grown for distinctly candy-striped roots that look like a target when cut open.

10M @ \$3.06 50M @ \$2.94 500M @ \$2.68 1MM @ \$2.55

TOUCHSTONE

GOLDEN BOY

NEW

BROCCOLI

LIEUTENANT 58 Days From Transplant - #9740NT

A nice improvement in the "first early" slot, Lieutenant is uniform maturing with a medium-large smooth, semi-domed, dark green head. It can be used in spring and fall. Improvement includes better holding and less likelihood of problems, such as leaves growing in the heads.

2.5M @ \$10.34 10M @ \$9.50 30M @ \$8.58 100M @ \$7.97 400 @ \$7.66

ASTEROID 59 Days - #7892NT

With excellent uniformity and good heat tolerance, we think Asteroid will prove to be widely adapted for both spring and summer seedings. Asteroid has medium-size, smooth stems making it one of the best heat tolerance broccoli varieties for bunching, but can also be used for crown cut.

1M @ \$10.05 2.5M @ \$9.69 10M @ \$8.90 30M @ \$8.04 100M @ \$7.47
400M @ \$7.18

EASTERN CROWN 59 Days - #7681NT

This heat tolerant, early maturing variety holds in the field extremely well and will keep its nice dark green color in hot weather.

1M @ \$12.67 2.5M @ \$12.22 10M @ \$11.22 30M @ \$10.14 100M @ \$9.41
400M @ \$9.05

EMERALD CROWN 61 Days - #5232NT

For most growers from North to South, Emerald Crown is the first choice for crown cut in warm weather. It has a smooth, high dome and short stem. The color is excellent and it resists purpling from cold weather.

1M @ \$11.38 2.5M @ \$10.98 10M @ \$10.08 30M @ \$9.11 100M @ \$8.46
400M @ \$8.13

GREEN MAGIC 62 Days - #6330NT

This widely adapted, bright green variety features good field holding for spring or fall crops. It is the best choice for growers that use side shoots.

2.5M @ \$9.33 10M @ \$8.57 30M @ \$7.74 100M @ \$7.19 400M @ \$6.91

EASTERN MAGIC 68 Days - #7772NT

Featuring very good heat tolerance and excellent field holding, Eastern Magic makes dark green, very high dense dome heads.

2.5M @ \$11.72 10M @ \$10.76 30M @ \$9.72 100M @ \$9.03 400M @ \$8.68

IMPERIAL 71 Days - #8237NT

Imperial needs warm days for the best quality. Widely adapted, it can be used in winter in the South. Imperial should be used for crown-cut only where it will make sturdy, large, heavy heads. Imperial is earlier maturing in spring, and later in fall.

1M @ \$10.51 2.5M @ \$10.14 10M @ \$9.31 30M @ \$8.41 100M @ \$7.81
400M @ \$7.51

MILLENNIUM 74 Days - #7923NT

Millennium resembles Emerald Crown but is later maturing with a heavier head. It holds longer in the field than other varieties. Anyone who grows broccoli should give Millennium a try both spring, and fall harvest slots.

1M @ \$11.93 2.5M @ \$11.50 10M @ \$10.56 30M @ \$9.54 100M @ \$8.86
400M @ \$8.52

EASTERN CROWN

EASTERN MAGIC

IMPERIAL

FORTRESS

BROCCOLI

BELSTAR 66 Days - #9243OR **ORGANIC**

Main season variety for fall crops. Excellent crown cut with very heavy, high-domed, tight heads, and refined, small uniform beads.

1M @ \$17.23 2.5M @ \$16.62 10M @ \$15.26 30M @ \$13.79

100M @ \$12.80 400M @ \$12.31

EMERALD STAR 75 Days - #7809NT

This is an exciting variety, maturing a few days after Imperial. It can handle extreme temperatures better than most other varieties and brings a new level of heat to a later maturing slot. Field holding is excellent. The plant is vigorous and the heads, for crown cut, are beautiful, large and firm.

1M @ \$9.73 2.5M @ \$9.38 10M @ \$8.62 30M @ \$7.78

100M @ \$7.23 400M @ \$6.95

AVENGER 80 Days - #5114NT

Avenger is widely used for harvest in cooler weather in fall, producing large, dense heads. If seeded early, it is only a few days later than Imperial. If seeded late, it will mature very late, similar to Expo. It is used for crown cut.

2.5M @ \$9.33 10M @ \$8.57 30M @ \$7.74 100M @ \$7.19

400M @ \$6.91

NEW FORTRESS 83 Days - #3799NT

Fortress should be used for late season, cold weather harvest, similar to Avenger or Expo. The very healthy, clean plant is tall and vigorous, and the head is held high on the plant. A narrow, clean stem allows for bunching (with a high plant population). With more spacing it can be used for the very fancy Asian Crown Cut. It will not purple and has resistance to Alternaria Pin Rot.

1M @ \$10.51 2.5M @ \$10.14 10M @ \$9.31 30M @ \$8.41

100M @ \$7.81 400M @ \$7.51

JACARANDA 57 Days - #4424NT

Perfect for a specialty market, Jacaranda makes a unique, purple head with early maturity. Easy to grow, although we recommend avoiding the first crops in early spring.

1M @ \$61.25 2.5M @ \$59.06 10M @ \$54.25 30M @ \$49.00

100M @ \$45.50 400M @ \$43.75

SPRING RAPINI Broccoli Raab 52 Days From Seed - #5366NT

Nice balance between vigor and slow bolting, this classic is an all around nice broccoli raab.

1oz. @ \$3.86 4oz. @ \$9.00 1lb. @ \$26.99 5lb. @ \$25.70

BURGUNDY 58 Days - #4471NT

This striking purple shoot type broccoli is easy to grow, and can be planted in most slots. Snap out and sell, the first shoots from center of the plant, and it will quickly send up side shoots. The shoot stems and florets are sweet and tender. Color is best when raw or quickly steamed. This is a normal, vigorous full-sized plant.

1M @ \$49.32 2.5M @ \$47.56 10M @ \$43.69 30M @ \$39.46 100M @ \$36.64

400M @ \$35.23

BR-752 70 Days - #4049NT

BR-752 is a new "sweet stem" or stick broccoli. It is grown like regular broccoli, but separate stems are harvested to be packaged as a bunch. BR-752 is slightly earlier and sometimes with a tighter bead than the standard sweet stem varieties. It is good in spring but better going from warm to cool. Each plant will have around 10-15 side shoots and should be harvested when the head is about 1 Inch (2-3 cm) diameter. If it is bigger than 1 Inch, the buds will start flowering (harvest promptly). Growers should experiment with pinching out the center shoot.

1M @ \$22.57 2.5M @ \$21.76

100M @ \$16.76 400M @ \$16.12

JACARANDA

BURGUNDY

EMERALD STAR

BR-752

RAPINI GRANDE

SPRING RAPINI

MONTABELLO 62 Days - #4470NT

For those wanting to grow separate stalks of broccoli, Montebello is ideal. Break out the initial head (which is salable) and you will get many shoots growing right back. Long green stems have a tight cluster of beads to make a small floret. Very sweet.

1M @ \$49.32 2.5M @ \$47.56 10M @ \$43.69 30M @ \$39.46 100M @ \$36.64
400M @ \$35.23

Other broccoli usually available untreated and organic include:
Gypsy & Diplomat.

BRUSSELS SPROUTS

DAGAN 100 Days - #8834OR ORGANIC

With a perfectly tall and straight stalk, and early maturity, Dagan has excellent yield potential and fancy quality. Dense, round sprouts and dark green. If you fertilize well early, and then cut back, the lower leaves will shed for easy harvest.

250 sds \$9.98 2.5M @ \$38.49 10M @ \$35.35 30M @ \$31.93 100M @ \$29.65 400M @ \$28.51

NEW SILVIA 103 Days - #4052NT

Silvia has a tall, vigorous plant with nice round, tight sprouts. HR: For / IR: Xcc

250 sds \$7.56 2.5M @ \$29.16 10M @ \$26.78 30M @ \$24.19 100M @ \$22.46 400M @ \$21.60

MARTE 103 Days - #7799NT

If you want to grow brussels sprouts without coddling them, give Marte a try. It handles heat and fertility stress better than most varieties. HR: Foc

Other Brussels sprouts usually available
untreated include: Capitola and Franklin.

RAPINI GRANDE 90 Days - #4087NT

From the Puglia region of Italy comes a special strain of rapini known as Leccese (from the town Lecce) that has extra large heads in addition to voluminous, glossy green leaves. We offer this seed from Italy and call it "Rapini Grande" for fall crops, when the maturity will be around 90 days from seed (Early Rapini is better for spring). For those unfamiliar with Rapini, or broccoli raab, it is really grown for the leaf, not the head, and is sold bunched before the flower buds open on the heads. Cut with as many leaves as possible.

ADANA F1 *Bunching, Finger-Sized Nantes 40-45 Days Baby / 60-65 Days Mature - #7628NT*

6 inch root. Mokum style carrot with taller tops making it more adaptable for bunching. Matures a little later than Aranka and Mokum. Maintains shape after mature.

10M @ \$1.33 50M @ \$1.21 500M @ \$1.13 3 MIL @ \$1.09

NAPOLI F1 *Early Nantes 55 Days Mature - #8138OR* **ORGANIC**

Full-sized early hybrid Nantes-type for bunching, producing 10" - 12" tops. Roots are bright orange and 8" long with good, sweet flavor.

10M @ \$1.96 50M @ \$1.84 500M @ \$1.76 3 MIL @ \$1.72

CAULIFLOWER

FUJIYAMA *Tropical Type 64 Days - #7643NT*

Get a jump on summer cauliflower with this tropical type. Fujiyama NEEDS heat to make make a big plant, and then it will produce a medium-sized sweet tasting head. Maturity is outstandingly uniform. When slotted right, the plant gets nice and big; but should be tied up for a truly white head. In South central PA, we do not seed earlier than the 1st week in June for crops beginning mid-August.

250 sds @ \$2.89 2.5M @ \$9.65 10M @ \$9.16 30M @ \$8.75 100M @ \$8.25

Carrot seed may have an NOP approved white coating to aid in direct seeding.

NAVAL F1 *Main Season Nantes 90 Days Mature - #5256NT*

Naval procures a strong blunt tip that is great for storage. Also exhibits vigorous tops and an 8 inch root that is 1 inch diameter.

10M @ \$1.38 50M @ \$1.26 500M @ \$1.18 3 MIL @ \$1.14

ISTANBUL F1 *Fresh Market/Slicing/Cello 75 Days - #7865NT*

Very uniform. Long and slightly tapered roots. Strong and erect tops. Very good early yields. High quality interior, deep orange with distinguishable core.

50M @ \$0.95 500M @ \$0.87 3 MIL @ \$0.83

NEW NAVEDO F1 *65 - 115 Days - #7539NT*

New variety showing good results as a slicer. Also good for fresh market bunching, 8-10 inch length root. Harvest early for fresh market or late for processing.

50M @ \$1.21 500M @ \$1.13 3 MIL @ \$1.09

NEW TRI-C5063 *62 Days - #3724NT*

This variety is unique in many ways. First is its reliability and uniformity throughout the growing year, due, in part, to very good heat resistance. The other unique feature is a small head size- perfect for roasting whole, small families, and farmer market sales. It is very early maturing, and, while the plant is somewhat small, the head stays nice and white. Head size is 5 to 6 " across, and nearly round, although it may get larger in fall crops. The more compact plant allows for a higher plant population.

250 sds @ \$4.20 2.5M @ \$14.04 10M @ \$13.32 30M @ \$12.72 100M @ \$12.00

CAULIFLOWER

BERMEO 66 Days - #6449OR ORGANIC

Bermeo is one of the best early heat tolerant varieties. It has a very good inside wrap but may need to be tied for larger sizes. Excellent quality and uniformity.

250 sds. @ \$10.62 2.5M @ \$35.51 10M @ \$33.69 30M @ \$32.17 100M @ \$30.35

FREEDOM 67 Days - #5077NT

Freedom has very good heat tolerance for reliable spring and fall crops. The heads are solid, with a high dome and very good inside wrap leaves

2.5M @ \$38.26 10M @ \$36.30 30M @ \$34.66 100M @ \$32.70

ALCALA 69 Days - #5335NT

Alcala has a tight and complete wrap when harvested at a smaller size (12 count). Heads can get larger but will then need to be tied. Heads are high round and dense. It has good heat tolerance and is widely adapted. Great performance in the southeast over winter and works both spring and fall in the north.

250 sds. @ \$7.44 2.5M @ \$24.87 10M @ \$23.60 30M @ \$22.54 100M @ \$21.26

FLAMENCO 71 Days

Flamenco is a productive and uniform hybrid for fall and late fall crops. It has unique, large, broad feather-shaped leaves that shade the heads well to keep them white. Heavy, dense heads have very good, sweet flavor. Great overwinter in the Southeast.

#6690NT

EGGPLANT

A-1014 ESTELAL *American Type 55 Days - #7933NT*

SEEDWAY EXCLUSIVE! A-1014 brings an entirely new level of quality, earliness, and yield to the "American" style of eggplant. It is up to 10 days earlier than any other variety and will provide a lot of fruit early. The fruit has a refined look, is firm and glossy, and a "just right" size for most grocery stores. The calyx are totally spineless and won't scratch the fruit, your customers or harvest crew. Fruit separates easily from the plant with a gentle tug. The plant is compact but stays healthy and productive for a full season. Most growers will not need to stake A-1014 and plants can be crowded.

250 sds. @ \$13.93 1M @ \$55.32 5M @ \$48.16 25M @ \$43.78 100M @ \$39.80

SANTANA *American Type 65 Days*

SEEDWAY EXCLUSIVE! Not only is Santana super productive over a long season, but it is also versatile with shiny, firm fruit that can be harvested from medium through extra-large sizes. The smooth, tear-shaped fruit have few, if any, spines on the cap. Santana sets freely at cooler and warmer than usual temperatures. The plant is huge and stays healthy.

LETTUCE Romaine

NEW TENDITA RZ *Green Mini Romaine 45 Days - #3847XZNT*

This mini-romaine is a "Crunchy" type with sweet very firm leaves, all the same size. It can be used to hold dips and fits in a clam shell. It can be sold as a tiny head or separated into even-sized leaves. HR: Bl:16-20,22-25,29,30,33-37EU/Fol:1/Nr:0

1M @ \$21.25 10M @ \$11.05 40M @ \$10.20 400M @ \$8.50

MONTE CARLO *Great Mini Romaine 53 Days - #6065XZNT*

Monte Carlo is glossy and extra-dark green. It grows fast, holds well without bolting, and is especially good for its ability to grow in cold weather with short days. It is also heat tolerant. The texture is between romaine and butterhead, with thick leaves and a very good shelf life. This green romaine does well and makes a good weight for hydroponic growers. HR: Bl 1-16, 19, 21, 23 Untreated seed primed & organic pellet.

1M @ \$8.40 10M @ \$7.80 40M @ \$7.20 400M @ \$6.00

SPARX *Romaine 58 Days - #4153NT*

A dark green romaine that grows tall and upright with straight ribs and has an overall attractive shape. Hearts are long, slender, and have good weight. Highly tipburn tolerant. 10M @ \$2.47 40M @ \$2.28 400M @ \$1.90

STRYKER *Romaine 73 Days - #9612XZNT*

A dark green romaine that produces large heavy heads with excellent internal quality and leaf texture. It grows tall and upright with straight ribs. Good for general boxing, processing, and hearts. Slot for spring and fall. Nice sweet flavor. Highly tip burn tolerant and bolt-resistant.

1M @ \$8.63 10M @ \$4.49 40M @ \$4.14 400M @ \$3.45

DOV *SEEDWAY EXCLUSIVE! Romaine 76 Days*

Dov is the best looking romaine bred to stay sweet in warm weather. Unlike other heat loving romaine, DOV is dark green and very tip burn tolerant. It makes a large, heavy, somewhat open plant and maintains a sweet flavor with heat stress. Organic seed & organic pellet.

BRENTWOOD

SOLID KING

DARK LOLLO ROSSA MTO

Eazyleaf lettuce is easy to cut, prepare and package and offers excellent shelf life. The thicker leaf texture makes it less wilted than baby leaf lettuce. In ideal conditions, Eazyleaf will grow back and can be cut a second time. Even sized leaves with vivid colors have an excellent presentation. Eazyleaf is a series from Vitalis that produces small, dense heads that can be sold whole, or, with one knife cut, the heads fall into separate evenly-sized and shaped leaves. With a heavier leaf texture, Eazyleaf has better shelf-life than baby lettuce.

NEW GRAZION RZ Green Leaf - #3834XZNT

Grazion is a large, sturdy, leaf lettuce with a fresh, medium-green color. It has intermediate Fusarium resistance.

PIRATE

ONIONS

CORTLAND *Long Day Storage 102 Days*

#6835OR **ORGANIC**

Cortland yields with the best, is very round, hard, and stores well. It has a nice thinner neck (which helps in drying) and a strong skin.

5M @ \$5.23 25M @ \$4.81 100M @ \$4.39

500M @ \$4.19

POWELL *Long Day Storage 108 Days #7902NT*

Long day yellow storage onion with strong tops. Powell also has Downy Mildew resistance.

100M @ \$4.78 500M @ \$4.55

BRADDOCK *Long Day Storage 105 Days*

#9456NT

Large, perfect, globe-shaped bulbs have a thick brown skin. Braddock is widely adapted, consistently successful, and stores through May. It has a small neck and thick skin.

100M @ \$3.57 500M @ \$3.40

Bunching Onions & Shallots From Seed

APACHE *Red Scallion 65 Days - #4064NT*

You can harvest early for a purple bunching or wait for a bulb to start forming for a beautiful spring onion, can be overwintered as well.

10M @ \$0.41 50M @ \$0.37 250M @ \$0.34

LONG WHITE *Bunching 65 Days - #8653NT*

Winter hardy bunching; sow in spring for summer crop or sow in fall for overwintering spring crop. Will naturally divide if left in the field.

¼ oz. @ \$3.12 1 oz. @ \$5.85 1 lb. @ \$40.95

5 lb. @ \$39.00

SAFRANE *Long Day Storage 106 Days #6742NT*

Reliably produces very hard, jumbo size bulbs with beautiful dark bronze skin. Vigorous tops and roots are thrifty with fertilizer, so well adapted to marginal and mineral soils. Storage potential through May.

5M @ \$4.15 25M @ \$3.82 100M @ \$3.49

500M @ \$3.32

RED CARPET *Long Day Storage 116 Days #8732NT*

Long day Red storage onion that is earlier maturing than Redwing with a slightly smaller size, but store just as well.

5M @ \$7.25 25M @ \$6.67 100M @ \$6.09

500M @ \$5.80

PARADE *Bunching 67 Days - #8654OR **ORGANIC***

Heat resistant bunching (green/scallion) onion. Thick, cylindrical white stems do not bulb. Somewhat short leaves help in packing.

10M @ \$0.62 50M @ \$0.57 250M @ \$0.52

PICADOR *Shallot 110 Days - #6314NT*

Seed-grown shallots are economical to produce and of equal quality to set-grown. When peeled, Picador is a beautiful tawny pink with a football shape. It peels easily and with no dry skin between doubled bulbs. Excellent yields and medium-long storage.

10M @ \$8.22 50M @ \$7.84 250M @ \$7.47

CONSERVOR *Shallot 112 Days - #6275OR*

A classic French teardrop shape is complemented with ideal flavor and a fresh pink color. It is easy to peel and there is no paper skin between the doubles. Conservor stores very well. **ORGANIC**

TOMATOES Grape Determinate Vine

RUBY CRUSH Red Grape 63 Days - #7552NT

Ruby Crush is blazing a trail in the tomato world! It works in a container, it shines in the field, and the sugary-acid balanced fruits resist cracking, unlike other determinate grape varieties. Plants are strong with good leaf cover preventing sun damage. The compact plants can be grown with minimal support (2 foot high fence trellising or standard tomato cage). **HR:** Fol (1,2), For, ToMV: 0-2 IR: Ss

TEDDY BEAR

SUNRICH GOLD

WILDFLOWER MIX

For most flower varieties, days to maturity and height are approximate and change with daylength.

PROCUT HORIZON - #3911NT

ProCut Horizon has an upwards facing head with yellow petals and a dark brown center. It is pollenless and day length neutral. Flowers are slightly smaller than Full Sun and Sunbright.

1M @ \$26.15 5M @ \$22.88 25M @ \$21.79

PROCUT ORANGE #3912NT

ProCut Orange is a golden orange, pollenless cut flower type sunflower that is day length neutral.

1M @ \$26.15 5M @ \$22.88 25M @ \$21.79

Wildflower

WILDFLOWER BEE POLLINATOR MIX #8471NT

Exclusively formulated to provide food and shelter for bees and other beneficial pollinators. Expect 2-4 years of blooms, after which weed competition may require additional sowing.

1# @ \$68.76 5# @ \$64.80 25# @ \$60.00

HELP RESTORE NUTRIENTS. INCREASE YIELD POTENTIAL.

In addition to vegetable seeds, SEEDWAY also sells “farm seed”: corn, soybeans, forages and small grains. Through this connection, we are able to offer cover crop seed to our vegetable grower customers. Some of the cover crop seed is warehoused in our Elizabethtown, PA vegetable seed location. The mixes and seed on the following page are warehoused at “farm seed” locations in PA, NY and VT. To purchase those seeds (that do not ship free unless you are near a warehouse) phone our Elizabethtown office at (800) 952-7333 or by phoning one of the SEEDWAY Sales Representatives listed on the inside cover.

COVER CROP SINGLE TYPE

Available in 25 lbs., 50 lbs. and up

ANNUAL RYEGRASS **DH-3** diploid annual ryegrass was developed for quick establishment, excellent crown rust resistance, frost tolerance and high forage yield. DH-3 exhibits excellent seedling vigor, and medium maturity, allowing consistency in forage yield throughout the season with good transition back into warm-season forage grasses. **FRIA** is a late maturing, widely adapted annual ryegrass with excellent cold tolerance. Other benefits include improved disease resistance to Crown Rust, Gray Leaf Spot and Helminthosporium Leaf Spot.

HAIRY VETCH Purple Bounty is a new winter hardy, early maturing hairy vetch variety developed for high nitrogen fixation (up to ½ of a subsequent crop's nitrogen), increased biomass for a thicker mulch and earlier flowering for more flexibility in planting succeeding crops. Vetch forms ground cover slowly in the fall, but root development continues through the winter with substantial growth in the spring. For maximum results, Purple Bounty should be in full bloom to allow for peak nitrogen contribution and to mow, roll or spray for maximum vetch kill. Spring oats or winter grains can also be planted with Purple Bounty to act as a protective cover for improved winter survival and increased erosion control. Purple Bounty is an excellent cover crop for nitrogen fixation, erosion control, bio mass, and weed suppression.

PHACELIA Phacelia is a plant that is native to the United States, but was adopted and improved by Europeans for use as a cover crop. Phacelia is quick to establish and will winter kill at 18 degrees. Phacelia is an excellent source of high quality nectar and pollen resulting in increasing the population and diversity of beneficial insects. Phacelia will begin to flower 6-8 weeks after emergence and will continue to flower for 4-6 weeks. Phacelia is comparable to buckwheat in many ways, but is more tolerant to cold and drought. Phacelia can also be used for forage, as a green manure crop, nematode control, and a nitrogen trap crop.

CRIMSON CLOVER Crimson Clover has erect stems, grows quickly and has larger seeds than the more commonly used red clover. Crimson Clover's primary advantages are rapid growth during cool weather, shade tolerance and good reseeding potential. Crimson Clover can be planted in early spring or fall for weed control. Because of its shade tolerance and reseeding potential, crimson clover is also effective as a living ground cover in orchards. Crimson Clover has been used effectively to suppress weeds when planted in the early fall following a short-season crop such as potatoes, snap beans, vegetables or following winter wheat. Planting with a grass such as oats, which is also fast-growing, gives additional weed control in these situations.

AUSTRIAN WINTER PEAS Austrian Winter Peas are a cool-season, annual legume with good nitrogen-fixing capabilities. Austrian winter pea is a low-growing, viney legume which has been shown to fix over 200 lbs. of nitrogen per acre per year under good conditions. It has hollow, slender and succulent stems, 2 to 4 feet long. The foliage is pale green, and the flowers are colored, usually purple, pink or reddish. The leaf consists of one to three pairs of leaflets and terminal branched tendrils. Pods are 1.5 to 2.5 inches long with three to five round, dark-colored seeds. Seed color is commonly gray with purple or brown mottles.

TRITICALE Triticale is a hybrid small grain produced by crossing wheat with rye. The name "triticale" is derived from the combined scientific names of the two crop species wheat and rye. The versatility that triticale offers as a grain, a forage, for straw and as a cover crop adds to the economic viability that sustains the interest in the crop.

OATS Oats are very versatile as they can be planted at various times of the season and used as an excellent cover and forage crop. Oats work well alone, but especially well in mixes with radishes, turnips, berseem clover, crimson clover and Austrian winter peas. Oats perform well for erosion control and are very good nutrient scavengers. Oats (and mixes with radishes or turnips) work very well for manure nutrient management.

SUNN HEMP Sunn Hemp is an excellent cover crop variety which produces large amounts of biomass through warmer conditions. Sunn Hemp will scavenge available nitrogen and will fix nitrogen levels when nitrogen is lost. Sunn Hemp will hold and produce sufficient nitrogen to provide nitrogen credit for the following crop.

ECO-TIL™ RADISH

Strong tap root extends deep into the soil to provide a wide variety of benefits for next year's crop. The fine root portion of the tap root can extend 6' while the upper portion grows up to 24". This tap root system reduces soil compaction, provides aeration and water infiltration and returns nutrients to the soil surface. This system helps suppress weeds and builds organic matter. Seeding Rate 10-15 lbs./acre broadcast • 8-10 lbs./acre Conventional or No-Till.

AVAILABLE FOR PURCHASE ON SEEDWAY.COM.

COVER CROP SINGLE TYPE

CALIENTE ROJO A Brassica Juncea blend with the highest glucosinolate concentration available making it an effective biofumigant. Very vigorous (and attractive). Use at 8-10 lb /acre.

AVAILABLE FOR PURCHASE ON SEEDWAY.COM.

NEMAT / CALIENTE ROJO A blend of Nemat arugula and mustard (Brassica Juncea). Caliente Rojo is a Brassica juncea blend with the highest glucosinolate concentration available making it an effective biofumigant. Rojo is very vigorous (and the red color is attractive). Used together, they provide an especially effective biofumigant for nematode and wireworm suppression along with weed & disease reduction. The Nemat also serves as a trap crop. Use the blend at 6-9 lb /acre. **AVAILABLE FOR PURCHASE ON SEEDWAY.COM.**

SUNN HEMP

ANNUAL RYEGRASS

CRIMSON CLOVER

HAIRY VETCH

ECO-TILL RADISH

SW - PR 25 lbs. per acre

80% Winter Pea - 20% Eco-Till™ Radish

- Rapid establishment to prevent wind and water erosion.
- Fixes atmospheric nitrogen to increase soil nitrogen levels.
- Improves soil permeability for increased air and water penetration, reduces soil compaction, and increases root development potential.
- Recycles nutrients that would have been lost to leaching or runoff.
- Potential forage for fall grazing.

SW - RYR 25 lbs. per acre

80% Fria Annual Ryegrass • 20% Eco-Till™ Radish

- Improves soil permeability for increased air and water penetration, reduces soil compaction, and increases root development potential.
- Recycles nutrients that would have been lost to leaching or runoff.
- Holds surface soil in place.
- Improves soil tilth which can benefit any crop that follows.
- Potential forage production for fall grazing.

SW - RYC 25 lbs. per acre

60% Fria Annual Ryegrass • 40% Crimson Clover

- Rapid establishment to prevent wind and water erosion.
- Improves soil permeability for increased air and water penetration, reduces soil compaction and increases root development potential.
- Fixes atmospheric nitrogen to increase soil nitrogen levels.
- Potential forage for fall and spring grazing, spring silage or hay.

SW - POR 50 lbs. per acre

50% Winter Peas • 40% Jerry Oats • 10% Eco-Till™ Radish

- Rapid establishment to prevent wind and water erosion.
- Improves soil permeability for increased air and water penetration, reduces soil compaction, and increases root development potential.
- Recycles nutrients that would have been lost to leaching or runoff.
- Fixes atmospheric nitrogen to increase soil nitrogen levels.
- Potential forage for fall and spring grazing, spring silage or hay.

SW - TCR 50 lbs. per acre

80% Triticale • 10% Crimson Clover • 10% Eco-Till™ Radish

- Rapid establishment to prevent wind and water erosion.
- Recycles nutrients that would have been lost to leaching or runoff.
- Fixes atmospheric nitrogen to increase soil nitrogen levels.
- Improves soil permeability for increased air and water penetration, reduces soil compaction and increases root development potential.
- Best used prior to corn, wheat or other crops requiring significant nitrogen inputs.
- Potential forage for fall and spring grazing, spring silage or hay.

SW - TRY 100 lbs. per acre

80% Triticale • 20% Fria Annual Ryegrass

- All grass mix.
- Excellent forage for fall and spring grazing.
- Improves soil tilth which can benefit any crop that follows.

	ZYMV	Zucchini yellows	Zucchini yellows mosaic potyvirus

HR - High Resistance. The plant can resist the growth, development or the damage cause by the pathogen.

IR - Intermediate Resistance. The plant will show fewer symptoms than a non-resistant or susceptible variety.

Abiotic (AB) - Physiological or environmental conditions that may cause a plant to express signs of stress or limits its growth or development.

Disease Reactions

CRACKERJACK - 80-82 Days

SEE PRICING ON PAGE 55

Consistent yields over wide range of growing conditions. Very uniform fruit shape, firm flesh and deep red interior. If you are catering towards bins or cartons, this variety this should definately be on your farm.

WEIGHT & BIN COUNT: 13-17 lbs.

Shape: Round/Oval

RIND: Dark Crimson Stripe

FLESH: Dark Red

DISEASE REACTION: IR: Co:1, Fon:1

BLACKJACK - 78 Days

SEE PRICING ON PAGE 55

Nice oval shape with outstanding internal red color. Firm flesh is extremely flavorful. Strong disease package.

WEIGHT & BIN COUNT: 15-23 lbs.

SHAPE: Oval

RIND: Dark Green

FLESH: Bright Red

DISEASE REACTION: IR: Co:1, Fon:1

GUARDSMAN - 85 Days

SEE PRICING ON PAGE 56

Great fusarium resistance. Vigorous and strong vines support and interior with excellent firmness and flavor. A must try variety!

WEIGHT & BIN COUNT: 16-24 lbs.

SHAPE: Blocky

RIND: Light Green With Medium Green Stripe

FLESH: Red

DISEASE REACTION: IR: Co:1, Fon:1, Sf
