

// PLANT. HARVEST. PROFIT.

RELATIVE MATURITY
91 DAYS**SW 9141***Conventional / Organic*

Crisp and clean appearance in the field. Adapted genetics plus proven performance in the Northeast market. Produces top yields of both high quality grain and silage with a superior fiber and starch package. First choice for early planting and chilled soils. The leafy plant helps shade the soil to deter weed growth later in the season. Superior staygreen, healthy stalks and roots plus plant intactness all contribute to a very durable hybrid throughout the growing season. Seed comes untreated.
