DuracadeViptera™

Top-shelf grain play with a state-of-the-art insect control trait package that provides both above and below-ground insect protection. Viptera® technology also protects against Western Bean Cutworm and Corn Earworm damage to maintain yield and quality. A fairly tall plant with wider leaves and nice dark green color. Consistent, girthy ears down the row produce high-quality golden grain with first-rate test weight. The lower ear placement and superior plant intactness both support good standability at harvest. Artesian® technology provides season-long drought protection.
