VT Double PRO® RIB Complete®

An attractive hybrid with the plant stature for silage plus excellent yields of high-quality grain. Strong out-of-the-ground for early planting and reduced tillage situations. The resistance to Anthracnose Stalk Rot supports reliable standability and superior plant intactness late into the season. A more semi-fixed ear benefits from a thicker plant population to maximize yields. Excels in moderate to high-yield environments with good management. Only available in a VT Double PRO® RIB Complete® technology trait package so use where Corn Rootworm is not a concern.
