

RELATIVE MATURITY 95 DAYS

SW 9504VT (RIB)

VT Double PRO® RIB Complete®

First choice for grain in the maturity when reaching for that ultimate yield experience. Stands strong right through harvest with healthy stalks that fight off Anthracnose Stalk Rot with the best of them. Consistent girthy ears down the row with superior tip fill. Moves north and south of zone and competes with fuller season hybrids. Good choice where Tar Spot pressure is expected to have an economic impact. Only available in a VT Double PRO® RIB Complete® technology trait package so use where Corn Rootworm is not a concern.
