TETON

Romaine

KEY CHARACTERISTICS

Teton is a widely adapted romaine including the West coast, Florida, Northeast US and Northeast Canada. It can be used for cartons, hearts or whole heads. Heads are large, tall and dark with straight ribs, dark green outside and pleasantly blonde inside. Teton slots well for Slots well in transition periods (Fall to winter, Winter to spring). It has a strong tolerance to tip burn and shows strong field tolerance to TBSV (tomato bushy stunt virus) and high resistance to BL-EU 21, 24.

DISEASE RESISTANCES (HR=High Resistance, IR = Intermediate Resistance)

HR: BL-EU 21, 24, TBSV

ELIZABETHTOWN, PA (800) 952-7333

LAKELAND, FL (863) 648-4242
