SmartStax®RIB Complete

This hybrid had the highest grain yield for maturity in its class out of more than 50 hybrids in SEEDWAY Research Trials to outpace the competition. The dual-purpose style plant has a semi-flex ear with more length than girth at a more moderate height with very good tip fill and husk coverage. More average general plant health and staygreen ratings hasten grain drydown in the fall to reduce drying costs. Can benefit from a fungicide application under heavy disease pressure. Adapted to all yield conditions and competes with fuller season hybrids in zone and south at moderate plant populations.
