## VT Double Pro® RIB Complete

Exciting, new hybrid engineered for the Southeast that checks off all the boxes. Brawny plant with long ears that flex at lower plant populations to maintain yields of high quality grain, even food grade potential, plus high tonnage silage. Strong stalks and roots, good on greensnap plus heat and drought tolerance for added stability. Fights off Southern Rust and Southern Corn Leaf Blight diseases which can both be a nemesis in this market, plus Anthracnose Rot. Available in both Trecepta® RIB Complete® and VT Double PRO® RIB Complete® technology trait packages so use where Corn Rootworm is not a concern.
