SmartStax® RIB Complete®

A full-season hybrid that's right at home in the deep south with the ability to move north. Kernels on the flex ear set up hard quickly after flowering and shell out big yields of high test weight grain at harvest. The plant is leafy with more upright leaves and can produce a lot of tons of fodder for feed. Superior late-season plant appearance into the fall. Good on Northern Corn Leaf Blight and Southern Rust. VT Double PRO® RIB Complete® and SmartStax® RIB Complete® trait packages are both available.
