NEW FOR 2024!

Recent introduction to the Seedway Organic line that is big and brawny. Adapted genetics with a proven track record in the Northeast market. Non-stop performance in the field and in the bunk. A real standout for silage with premium tonnage plus an enviable fiber and starch package. Shells out a lot of bushels of grain and produces energy-rich feed to make a lot of milk. A shanky, large-eared hybrid with deep kernels and a small cob that really struts its stuff. The leafy plant helps shade the soil to deter weed growth later in the season. Fast out of the ground for early planting and superior intactness right through harvest plus fights off Northern Corn Leaf Blight. Seed comes untreated.
