# SW 9696 *Organic*

**NEW FOR 2024!**

Recent introduction to the SEEDWAY Organic line that produces dependable yields of both grain and silage with ears that normally fill to the tip. Adapted genetics plus proven performance in the Northeast market. A very consistent performer in field after field with a very clean and uniform appearance. It gets off to a fast start even in cold soils and is well suited to early planting and reduced tillage practices. The leafy plant helps shade the soil to deter weed growth later in the season. First choice for the tough acre, droughty soils or where heat and stress is expected. Resists Anthracnose Stalk Rot. Seed comes untreated.
