

// PLANT. HARVEST. PROFIT.

RELATIVE MATURITY
103 DAYS**SW 0365RR***Roundup Ready® Corn 2*

103RM hybrid with Glyphosate tolerance where above and below insect protection is not required. Long, well-filled ears with flex that take lower plant populations plus good husks that loosen in the fall to accelerate grain drydown. Deep kernels on a smaller cob with solid test weight for grain plus good levels of highly digestible starch and fiber. Good choice for early planting with reliable standability. Wide adaptation across the Northeast wherever the maturity fits.
