

COVER CROP MIXES

SW-EC EROSION CONTROL MIXTURE

- Improves soil permeability for increased air and water penetration
- Recycles nutrients that would have been lost to leaching runoff
- Holds surface soil in place and establishes rapidly
- Aggregates soil with a fibrous root system, making a mellow seedbed, which can benefit any following crop and improve soil
- Seeding Rate: 15-20 lbs. per acre.

MIXTURE COMPONENTS

Annual Ryegrass	85%
------------------------	------------

Radish	15%
