

COVER CROP MIXES

SW-NC NEMA CONTROL MIXTURE

New mix used to kill nematodes with a dual mode of action: growing roots and Biofumigation. Additionally, this mix provides excellent ground cover to reduce soil erosion and suppress weed seeds. Seeding Rate: 20-25 lbs. per acre.

MIXTURE COMPONENTS

| | |
|---------------------|-----|
| Control Radish | 80% |
| Master White Clover | 20% |
