

# COVER CROP MIXES

## SW-SI SOIL IMPROVEMENT 1.0 MIXTURE

- Improves soil permeability for increased air and winter penetration
- Improves soil structure though large biomass
- Fixes significant atmospheric nitrogen for increased soil nitrogen levels
- Performs best when used prior to corn, wheat or other crops requiring significant nitrogen inputs
- Seeding Rate: 60-80 lbs. per acre.

### MIXTURE COMPONENTS

|              |     |
|--------------|-----|
| Peas         | 40% |
| Triticale    | 30% |
| Common Vetch | 22% |
| Radish       | 8%  |
