

# FORAGE SORGHUM

- BMR-6 hybrid
- Top yielding variety
- Branchyte dwarf with excellent standability
- BMR-6 with top notch feed quality
- Aphix SCA tolerance
- This is a benchmark of high yielding forage sorghums in the lineup
- Superb agronomics
- Safened treated
- Plant after soil temps reach 60 degrees

APHIX Elite Sugarcane aphid tolerance that protects sorghum crops anywhere aphids strike.

## CHARACTERISTICS & CROP USE

Relative Maturity: Full	Silage: 10
Midrib: BMR-6	Dry Hay: 8
Seeds/lb. (1,000): 16 to 18	Continuous Grazing: 8
Plant Height: 4.5-5.5 ft	

# F 45-D50S

# Branchyte Dwarf

## RATINGS

Yield For Maturity	10
Forage Quality Yield Potential	10
Palatability	10
Digestibility	10
Seedling Vigor	10
Recovering After Cutting	8
Plant Uniformity	10
Standability	10
Downy Mildew	8
Anthrachnose	8
Fusarium Wilt	8

## FIELD POSITIONING

Tough Dryland	S
High Yield Dryland	S
Limited Irrigation	Hs
Full Irrigation	Hs
No Till	Hs
Poorly Drained Soils	Ma
Anthrachnose Prone Area	Hs
Fusarium Prone Area	S

### KEY:

Hs-Highly Suitable  
S-Suitable  
Ma-Manage Appropriately  
Ht- High Tolerance  
T-Tolerant  
NR-Non Resistant  
10=Best, 1=Worst
