NEW FOR 2025!

Trecepta®RIB Complete

Exciting new, full-flex hybrid that was a standout in the 2024 strip trials. Superior genetics and trait protection allow profitability on any acre. Outstanding early vigor gives flexibility for planting no-till acres. Excellent defensive package including tolerance to Tar Spot, Northern Leaf Blight, and Anthracnose Stalk Rot allows for top yields while not sacrificing grain drydown. Full flex ear enables good yield performance even under moderate plant populations. Only available in a Trecepta® RIB Complete® trait package so use where Corn Rootworm protection is not needed.
