NEW FOR 2025!

Trecepta®RIB Complete

The 2024 Strip Trials have unveiled a new Trecepta[®] hybrid that is set to transform your yield potential. This hybrid stands out not just for its remarkable yield but also for its robust test weight, making it a top choice for farmers looking to maximize their harvest. What's more, this hybrid has proven its grit in tough conditions, thriving even in drought and heat stress. With medium-tall plants that boast strong stalks and excellent root systems, you can count on enhanced standability and drought resilience, especially late into the season. But it doesn't stop there! The grain quality is exceptional, opening doors for food grade applications, and its efficient drydown means you can enjoy a swift harvest. Don't miss out on the opportunity to boost your productivity with this innovative hybrid! Only available in a Trecepta® RIB Complete trait package so use where Corn Rootworm protection is not needed.

HIGH YIELD ACRE	9	LOAMY SOILS	9
MODERATE YIELD ACRE	8	LIGHT SOILS	8
LOWER YIELD ACRE	8	PLANT POPULATION	M/MH
STRESS TOLERANCE	7	MOVES NORTH OF ZONE	YES
EARLY PLANTING	7	MOVES SOUTH OF ZONE	YES
HEAVY SOILS	7		

9 = BESTNR = NOT RATED T = TALLM = MEDIUM MT = MEDIUM TALL MH = MEDIUM HIGH ML = MEDIUM LOW

Cow Head: This denotes varieties are proven, reliable silage hybrids.
