

// PLANT. HARVEST. PROFIT.

RELATIVE MATURITY  
**90 DAYS****SW 9093SS (RIB)****NEW FOR 2026!****SmartStax® RIB Complete®**

Exciting, new addition to the SEEDWAY lineup with yields that rival the popular SW 9035SS including both above and below ground insect protection. Very strong coming out of the ground in the spring giving it an edge for a strong finish in the fall with superior plant intactness. Ears have a good amount of flex at lower populations and positioned at a more moderate height with husks that loosen to provide reliable grain drydown at harvest. Shines on the more moderate to high yield acre both in zone and north, but holds up well under drought and stress and where corn follows corn. A Trecepta® RIB Complete® trait version is in the works that will provide protection against both Western Bean Cutworm and Corn Earworm when available.
