NEW FOR 2026!

Duracade®

A seriously robust hybrid in the field that is big and leafy and should ring the bell for silage grower. Outstanding yielder of quality grain with ears that have a lot of flex to them plus with the ability to put on some really large ones when plant stands are lighter than planned. The vigorous seedlings make it a top choice for no-till and minimum till situations. Widely adapted to perform up to expectations under high, moderate, and even less productive yield conditions when under stress. Recommended in zone and north.
