SW 9543v4 (RIB)

NEW FOR 2026!

VT4 PRO™ RIB Complete®

Expanding our VT4PRO™ trait package offerings into 95 RM genetics, combining the proven above ground insect protection of Trecepta® plus below ground insect protection. Both SW 3768SS and SW 9550SS are nearing the ends of their life cycles and the new SW 9543V4 should bring a new level of yield into the picture. Good test weight and fast grain drydown. Tolerance to both Northern Corn Leaf Blight and Gray Leaf Spot plus superior ratings for Anthracnose Stalk Rot. Optimum performance in moderate to high yield environments in zone and south and holds up well under drought and stress. Recommended for acres with low to moderate Corn Rootworm pressure and at higher risk for Western Bean Cutworm or Corn Earworm damage.
