

NEW FORAGE SORGHUM SUDANGRASS TO THE LINEUP!

TRIPLE CROWN

BMR FORAGE SORGHUM-SUDANGRASS HYBRID

A NEW Forage Sorghum-Sudangrass Hybrid, TRIPLE CROWN. This exceptional hybrid has reduced lignin giving enhanced digestibility and palatability and the ability to graze late season. TRIPLE CROWN is a versatile BMR sorghum x sudangrass hybrid that can meet most summer forage needs. It is strong tillering and has a good leaf-to-stem ratio with increased leaf percentage allowing for easier harvest and faster dry time.

TRIPLE CROWN can be flexible with planting date, having the ability to double crop with winter wheat. Good weather resistance and disease resistance to anthracnose and downy mildew. You can't go wrong with TRIPLE CROWN BMR Forage Sorghum-Sudangrass Hybrid!

IDEAL FOR

- Grazing
- Hay
- Haylage
- Greenchop
- Dryland/Irrigated

KEY FEATURES

- BMR-6 gene
- More efficient feed source
- Good weather resistance
- Good leaf-to-stem ratio
- Multiple cut potential
- Easy to manage
- Increased production over non-BMR Forage Sorghum-Sudangrass hybrids

MANAGEMENT

PLANTING DATE	Flexible
SOIL TEMP	Plant at 60° F
SEEDING DEPTH	1" to 1 1/2"
PLANTING RATES	Dryland: 15-40 lbs./acre Irrigated: 30-60 lbs./acre
FERTILIZER	1-1 1/4 lbs. N per growing day per acre
